

BeHear™

A truly personal, concept Bluetooth® headset

BeHear features advanced signal processing with built-in hearing enhancement and assistive listening technology. Improve your entire hearing experience, whether you are:

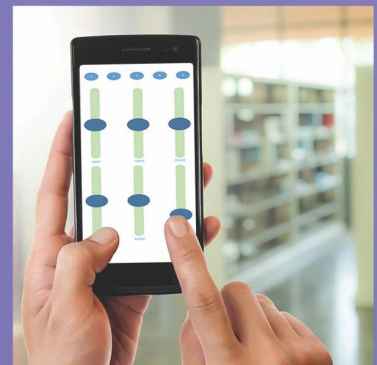

- listening to audio
- speaking on the phone
- simply going about your daily activities

Enjoy audio tailored to your auditory system, and phone calls with improved intelligibility.

Enhance your hearing of ambient sounds without the distraction of unimportant noises.

Generate personal hearing profiles for any environment, wherever you are.

Wear & Hear

a concept of the future by
