

# Alango Sound Effect Normalization (SEN) Technology

Do you like watching movies? Sporting events? TV shows?

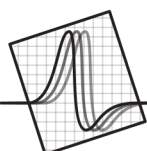

Have you noticed that they are getting noisier and noisier as time goes by, making it more and more difficult to follow the dialogue? Or, at least, is that what you feel is happening?

If so, you may think there is nothing you can do to make the background noise softer and less annoying, the speech more intelligible, and the whole experience more enjoyable.

You are right, you cannot. However, technology can.

Alango Technologies is introducing a revolutionary Sound Effect Normalization technology or, simply, SEN.

Activate SEN technology on your device and enjoy listening again, as before, as it should be: the proper mix of music, sound effects, and spoken dialogue.
