

The Freedom to Hear Better

The “Silent Epidemic” of Untreated Hearing Loss

1 in 7 people worldwide have some level of hearing loss, which when left untreated can lead to poor performance at school and work, isolation, depression, cognitive decline, and even dementia. Still, *less than 5% use hearing aids*. Reasons include high cost, social stigma, inconvenience, and unmet expectations.

Hearing Loss Worldwide
1.2B people have hearing loss
460M have disabling hearing loss

Hearing Aids Usage
<25% of people in developed countries
<5% in low-income countries

Alango Technologies to the Rescue

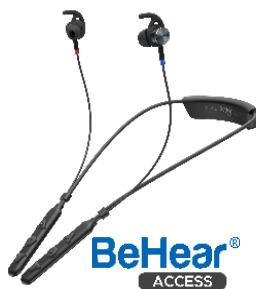

Established in 2002, Alango Technologies, Ltd. is a leading supplier of sound enhancement technologies for voice communication. In 2015 we launched the BeHear line of personalizable hearing amplification solutions that provide stylish, affordable, and self-tuned listening experiences. Important sounds, peoples’ voices, and streamed audio are all adapted to suit the wearer’s specific hearing preferences.

Guiding Principles of the BeHear Line

- **Self-Fitting** – Personalization and real-time customization using an app for iOS and Android
- **Affordable** – All the features of an advanced hearing aid for a fraction of the price
- **Design** – Stylish, fashionable, and lightweight consumer electronics form factor
- **Connectivity** – Bluetooth® protocol for sound enhancement in mobile calls and streamed music
- **Sound Quality** – Top acoustic components and advanced chipsets provide best quality sound
- **Evolving** – In-house development ensures existing customers receive improvements and new features
