## Generate more business with this **Express Hearing Check Kiosk**

- Interesting Lifestyle/Health & Wellness product
- Attractive and self-operated
- Provides a new service, drawing in new business
- Interests your patrons while they wait
- Reduces hearing screening time in your clinic

*The kiosk is compact and inviting.*

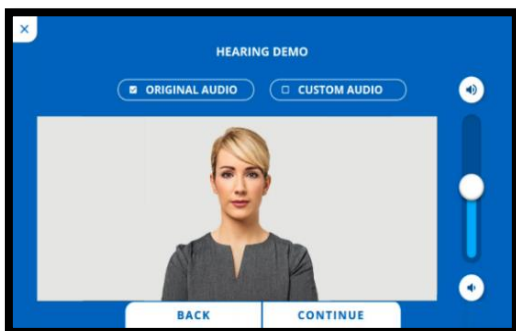

### Hearing Status is Good to Know

Most people don't get their hearing checked regularly, and may be curious about their hearing ability. This quick, self-managed hearing check can show your patrons where they stand. By placing it in your facility will you be offering them a new service, and a solution as well.

### Where Can the Kiosk Be Installed?

This compact kiosk takes up only 10x12 inches of counter space, and can be installed easily in pharmacies, optical shops, retirement centers, senior day care facilities, electronics shops, nursing homes, and other public places.

### Why is it Attractive to Patrons?

*Visitors can compare what they hear with and without the BeHear technology applied.*

With the kiosk, visitors check their hearing in a matter of minutes, and then get their results on the spot! They compare what they currently hear with what they **could** be hearing.

This kiosk will encourage customers to look for products that will improve their quality of life. The BeHear line is well-positioned to offer such solutions.

# BeHear

## BeHear Assistive Hearing Solutions

Our personalized hearing amplifiers can be customized independently, or with the help of someone from your staff, without having to rely on a separate visit to a hearing professional.

Our award-winning assistive hearing solutions are flexible and if desired can be used for specific situations, when needed. They enhance hearing for live conversations, mobile calls, music listening, TV watching, and sounds in nature.

## Easy Installation & Operation

The kiosk interface is available in a wide variety of languages, and can be modified to reference specific products or features, based on your facilities' specific requirements. An operator's manual is supplied to support final assembly and set-up.

## About Alango – BeHear

We create products that help people understand each other, appreciate music, enjoy sounds in nature, and feel fully connected to the world. Our BeHear line is the result of 20 years of experience helping other companies make their products sound better, coupled with our passion to enable people to live richer lives. We are confident our products could benefit so many, and hope you will help us by making them available in your facility.
